Enthu Technology Solutions India Pvt. Ltd., established in 2007 and certified with ISO, is a dynamic organization led by a group of young entrepreneurs. For the past three years enthutech is associated with Gobi Arts & Science College. In the realm of Industry Institute Collaboration, operate Enthu Academic solutions to bridge the gap between industry and our institute. They achieve this by facilitating laboratory setup, offering real-time exposure to research activities, and providing industrial training and development opportunities, contributing to the mutual growth of both our institution and the industry.

Mayagreens fosters collaboration among farmers, enabling them to share ideas, discover new opportunities, and grow together as a community. From 2021, Mayagreens Pvt.Ltd is associated with Gobi Arts & Science College by sharing its knowledge on LoRa WAN technology. As a result of this collaboration a LoRA WAN antenna having coverage of 10Km radius is established in the institute with its support and numerous R&D activities are started to support farmers by providing

- Microclimate monitoring service
- Platform for Automating and Connecting farms and farmers
- Creating an Innovative end-to-end Agritech Ecosystem
- Creating farmers network to enable community farming.

A handwritten signature in black ink is placed over a green ink stamp. The stamp contains the text "Principal" and the date "19/01/2024".
